anats
health products

Product Catalogue

COMPANY

ANATS was founded in Athens in 1982. It is an innovative company in the health sector with the main objective of importing, exporting, manufacturing and distributing medical, hospital, parapharmaceutical, medical technology products of high quality and advanced technology. It is based in privately owned facilities.
facilities in Tavros, Attica. It cooperates with renowned logistics companies as well as transport companies for the proper storage and distribution of products.

VISION

Its priority is the continuous improvement of the quality of human life! In order to best meet the needs of its customers, it provides a wide range of quality, reliability and absolute safety of innovative and innovative products and services . It manages to lead a central role in the Greek and international market, to grow and ensure a continuous upward trend in the Greek and international markets and successful course. In the context of the above, it has installed, implements and and maintains a quality management system that fully complies with the
EN ISO 9001:2015 / EN ISO 9001:2015 European directives and standards.
13485:2016 / DY8/1348/04 by EKAPTY (since 1999)

PRODUCTS

ANATS S.A. is the exclusive representative of well-established and certified products and brands from abroad. Indicatively we mention:
BIOCHEMICAL / NISSEI / RAYS / RADIAN / ROMED / I-HEALTH / BORSAM / CORONATION and BIOHEM, BIOHEM, CORONES, CORONES and many more which fall into the following basic categories:
1. DIAGNOSTIC SUPPORT DEVICES / IN VITRO PRODUCTS
2. CONSUMABLE HEALTH AND MEDICAL DEVICES
3. BABY ECOLOGICAL AND DAILY CARE PRODUCTS
4. MEDICAL HOSPITAL EQUIPMENT
5. ORTHOPAEDICS & AIDS
6. FOOT AND HEALTH
ANATS SA manufactures products under its own brand name with the following logos:
"SAFETY A.T./G", "MAC-CHECK ANATS", "TERMO SAFETY", "TARGET", "ANATS Health Products"

ACTIVITY

The categories of its clients are:
Public and Private Sector Nursing Institutions / Diagnostic Centres / Cooperatives Pharmacists' Cooperatives / Pharmaceutical Warehouses / Pharmaceutical Companies / Pharmaceutical Distributors / Pharmaceutical Distributors /
Wholesale of professional cleaning and hygiene products / Pharmacies / Pharmacies / Shops Medical and Orthopaedic Supplies / Food Industries - Super Market / Shipping Companies / Cosmetic Stores / Specialized Cooperation Programs with i Health products. Through exclusive partnerships, it also serves major international markets.

DISTINCTIONS - AWARDS

Indicatively mentioned are:
- The products it represents meet all safety standards and meet the
The products covered by the company meet all the necessary European and international certifications.
- Since 2011, the company has been recognized by ICAP in the group of the "Strongest Strongest"Companies in Greece" based on the ICAP score which makes it one of the strongest companies in Greece secure companies in Greece. Only one out of ten companies participate in this group in Greece.
- In 2009 ANATS S.A. was recognized with the award of the best agent in Europe by TRUPHATEK construction company.
- In 2011 it was awarded by the construction company BIOCHEMICAL SYSTEMS as the most most innovative dealer for the use of wireless health technologies (iHealth projects).
- In 2012 he supported the project of the "Philodasiki Union of Athens" with the aim of reforestation of bare land, the development of philodassian consciousness and the protection of the environment. protection of the natural environment.
- In 2014 it was awarded as the fastest growing commercial agent of the NISSEI construction company.
- It has received awards in the context of its corporate responsibility from several institutions with The latest award is that of Doctors of the World for its contribution to the efforts of organization's efforts in the field of migration in the fall of 2015.
- In 2018-2019 she has supported the Panhellenic Association of Women with Breast Cancer "Alma Life" a non-profit association, founded in 1988 by women who had experienced personally experienced breast cancer, aiming for a world without deaths from cancer a world without breast cancer.
- During the 2019-2022 Pandemic it has successfully participated as a key
- During the pandemic, the company has been a key supplier of materials for SARS-Cov2 diagnosis and the vaccination programme of the relevant ministries. Has received in 2021 an honorary award for its participation in the development and clinical study of the Cardio Now ecosystem by the Hellenic Society Cardiovascular. In collaboration with the Demokritos Research Center and the European Commission for the Promotion of Resuscitation the support of a medical staff led by cardiologist Dr. Maniotis Christos.

With responsibility and respect for our fellow human beings and our partners, we offer innovative and reliable products and services. The trust that you have shown us for so many years commits us to continue to evolve and contribute dynamically to the upgrading of the quality of our cooperation.

DEFIBRILLATORS

RADIAN AED (Heart Guardian) Automatic External Defibrillator: helps to restore normal heart function from acute heart diseases by performing an electrocardiogram and, if deemed necessary, an electric shock in case of sudden cardiac arrest.
RADIAN AED (Heart Guardian) Automatic External Defibrillator, provides accurate analysis of the patient's body conditions and defines the exact number of electric shocks the patient needs, providing safety and quick results.

AED HR-701
AED HR-701 Plus

The Heart Guardian HR-701 Series Automatic External Defibrillator is an emergency medical device that helps restore normal heart function to people who have lost consciousness due to sudden cardiac arrest.
The HR-701 series automatically detects heart rhythm in cardiac arrest victims and delivers an electric shock to the heart to restore its normal rhythm.
The AED Plus Defibrillator with 4.3'' LCD screen.

Defi® 5s Adult / Child AED

The Defi 5s defibrillator is an automated external defibrillator. The AED storage software supports AED for receiving data sent via infrared.
The AED storage software supports reading and setting of cardiopulmonary resuscitation waves, AED language setting, reading, analysis, and storage data can be retrieved from the storage software.

DEFIBRILLATORS

Defibrillator HeartGuardian HR-501 RADIAN AED

Automatic Defibrillator RADIAN Model HR501 2 languages.
Automatic self-check once a month
Adult/child toggle button
Energy 150J±10% (Adult) / 50J±10% (Child)
Guidance process with LED lighting / Voice Commands
Size: 223(Width) x 312(Length) x 85(Height)
Weight with Battery: 2.2kg

CODE: 496-05-002 (DEFICINER GREEK)
CODE: 496-05-001 (DEFICTOR ENGLISH)

Training Defibrillator Radian Aed HR-501T

Training Defibrillator Radian Aed HR-501T with Greek
pronunciation.
Ideal for training personnel in the process of rescue by
defibrillation of the patient.

CODE: 496-05-003

Defibrillator HeartGuardian HR-701 RADIAN AED

Automatic Defibrillator Radian Aed HR-701 4 languages.
HEART GUARDIAN HR/701
Automatic self-check once a month
Adult/child toggle button
Energy 150J-250J for an adult / 50J for a child
Visual guidance with LED lights
Size: 222 (length) x 280 (width) x 75 (height)
Weight with battery: 2.3 kg (5lb)

CODE: 496-05-006

Defibrillator HeartGuardian HR-701 Plus RADIAN AED

Automatic Defibrillator Radian Aed HR-701 4 languages.
HEART GUARDIAN HR-701 PLUS
Automatic self-check once a month
Adult/child toggle button
Guidance with Voice Commands
Energy 150J-250J for an adult / 50J for a child
4.3" LCD screen (HR-701 plus)
Size: 222 (length) x 280 (width) x 75 (height)
Weight with battery: 2.3 kg (5lb)

CODE: 496-05-005

Defibrillator Defi ® 5s

Automatic Defibrillator Defi® 5s 2 languages of choice
Operation button for adults / children
Daily, Weekly and Monthly Self-test Energy 150J - 200J for adult /
50J - 75J for child
Size : 300 (length) x 240 (width) x 80 (height)
Weight with battery: 1.9 kg (4.2 lb)

CODE: 632-05-002

Battery AED HR -501

Model :BT-303
Use: Battery to supply power to the defibrillator
Type : LiMnO2 (DC 12V 4.2A)
Size : 60(H) x 175(W) x 25(D)mm
Weight : 285g
Lifetime : 4 years

CODE: 496-02-001

AED Battery HR -701 & 701Plus

Type: Lithium Manganese Dioxide LiMnO2 (12V DC 6A), non-rechargeable
Baros: 285g
Battery life: 4 years

CODE: 496-02-007/005(PLUS)

Battery AED Defi 5 s

Type: 12V, 2800 mAh Li -Mn02 Cell (Non-rechargeable)
Battery life: 4 year

ΚΩΔ: 632-02-002

Electrode for AED Defi 5 s defibrillator

Type:Gel-coated inserts from their manufacture /
self-adhesive / non-polarized defibrillation pads / also suitable for adults / non-sterile
Shelf life: 2 year

CODE: 632-02-003 (ADULTS)
CODE: 632-05-004 (CHILDREN'S)

Electrode Defibrillator AED HR -701 & 701 Plus

Type: Pads that have gel in their construction / self-adhesive / non-polarized
defibrillation pads / suitable for both children and adults / non-sterile
Lifetime: 2 years from date of manufacture
Size and length: 110X120mm /1.8m
Case Size: 170x250mm

CODE: 496-02-006/004 (PLUS)

AED HR501 Defibrillator Electrode

Model : P-303
Usage ? Performs electrical body on the patient, Detects the patient's
heart rate
Type : Adhesive pads for adult/child
Size : 145(H) x 98(W)
Weight : 120g
Lifetime : 2 years

CODE: 496-02-002

DEFIBRILLATORS ACCESSORIES

RADIAN AED HR501 AED wall bracket

Radian Aed HeartGuardian defibrillator wall bracket. With retaining straps, for supporting and mounting the defibrillator on a wall. Suitable for Ships, public places and buildings, so that the defibrillator can be placed in a prominent place for its timely use in case of emergency.

CODE: 496-02-009

Security box ARKY outdoor defibrillator with alarm

Outdoor defibrillator box
Made of highly durable polystyrene. Features an alarm, which is automatically activated when the door is opened. Powered by a low cost battery. 100% waterproof and dustproof. Suitable for all automatic external defibrillators.
Dimensions: 40x34x20 cm
Available in green colour

CODE: 613-02-001

AKRY 60121 Indoor AED box without alarm

ARKY metal indoor defibrillator box without alarm. It is the ideal solution for offices, public services, gyms, swimming pools, etc. It is incredibly durable and its paint is electrostatic remaining unchanged in time.
Its dimensions are 38 x 38 x 20 cm
Available in green.

CODE: 613-02-002

AED indoor box AKRY round

ARKY indoor defibrillator box round.
It is the ideal solution for offices, public services, gyms, swimming pools, etc. It is incredibly durable and its paint is electrostatic, remaining unchanged in time.
Its dimensions are Dimensions:
Length: 48 cm,
Height: 48 cm.,
Depth: 18 cm.
Available in green.

CODE: 613-02-003

ULTRASOUND DEVICES (DOPPLER)

Doppler ES102 EX 2MHz Fetal (Fetal Doppler)

Desktop device for uterine ultrasound, Hadeco Japan, power/rechargeable battery with speaker and heart rate display, volume indicator and battery capacity indicator, heart rate freeze button for annotation and 2.25MHz head. The Hadeco EchoSounder ES-102EX is an embryonic Doppler. It features a large, easy to read and display fetal heart rate and a built-in speaker for optimal sounds. The EchoSounder is used to monitor fetal heart rate in the doctor's office and hospital during during the second and third trimester of pregnancy.
- Fetal Doppler with LCD display
- Monitor fetal heart rate in the doctor's office
- Large built-in speaker for optimal fetal heart sounds
- With battery function
Head: 2.25 MHz
Focused 20 mm dia. distributor
Ultrasonic power: 2.14 mW/cm2 (Ispta, on-site)
Power source : 6V Ni-Cad battery, rechargeable at 100 -120 or 220 240V, 50/60 Hz
Full charge time: 10 hours
Full charge usage time: 5 hours (maximum volume)
Auto power off: If no signal: 3 minutes.
3.5 megaphone output:250 mW or more
Heart rate range:60 to 240 bpm, accuracy: 3%
Frequency characteristics:230 ± 50 to 800 ± 150 Hz
LCD Display:Heart rate, sound level and battery level.

CODE: 012-05-011

Doppler Smart 45PROBE 2MHz Fetal

Hand-held bi-directional DOPPLER with LCD display & EXTRACTOR
Hadeco Bidirectional Doppler with waveform display and printer. Provides bidirectional velocity waveforms & numerical data. Fetal heart rates and fetal heart rate and monitoring waveforms when used with a probe
2MHz. Hadeco SMART MICROPROCESSOR DESIGN Fully automatic gain control & baseline adjustment. There are various operating settings available with the LCD menu and unique scroll button. Memory storage 30 waveforms. USB INTERPACE COMPUTER Optional communication cable and software is provided
Smart-V-LinkTM. Stores waveforms & numerical data on the computer for data analysis and archiving.

CODE: 012-05-023

Vascular Doppler Echo Sounder ES-101EX (Fetal)

Doppler in mobile phone with built-in speaker and transducer.
- Large LCD display for fetal heart rate.
- 2 AA alkaline batteries
SPECIFICATIONS
Head 8,2 MHz
Power source DC 3V, AA alkaline batteries (1.5Vx2) pieces
Battery life 5 hours or more when sound is at maximum Auto shut-off
No signal in 3 minutes
Maximum speaker volume Approximately 250mW
Heart rate 30 to 240 beats, accuracy 3%
Speed From 0 to 99 cm/s, accuracy ±15%
LCD display
Waveform movement, speed (maximum and minimum) heartbeats (bpm).
Volume, low heartbeat indication.
External performance
Headphones (3.5m)
Environmental conditions 10-40 degrees 10-40 degrees 85% humidity or less without condensation
Storage and transportation From 0-50 degrees 85% humidity or less without condensation condensation
Dimensions 45(W) x 139(D)x30(H) mm
Weight: Approximately 150 grams including batteries
150-150 KG (INCLUDING BATTERIES)
Maximum and minimum blood flow determination
150 ml/minimum and minimum blood flow
Maximum and minimum blood pressure measurements
Measurement of blood pressure and blood flow measurements

CODE: 012-05-018

4

OXYMETERS

BLOOD OXYGEN SATURATION MONITORING

Pulse oximeters are devices designed to be placed on a finger to obtain in a few seconds the blood oxygen saturation level (SpO2), expressed as a percentage. Values above 95% should be considered natural, and therefore generally good, while the lower they are below this threshold the more critical they are (an insufficiently oxygenated blood does not properly nourish the body's tissues and organs).

SpO2 is an important parameter for the prevention of critical conditions affecting internal tissues and organ function, providing important information to the physician about the possible presence of serious pathologies such as: Heart failure, arterial stenosis, ARDS (acute respiratory distress syndrome), COPD (chronic obstructive pulmonary disease), pulmonary emphysema, congenital heart defects, cystic fibrosis, critical conditions caused by drugs (allergy or overdose).

In addition, the use of a pulse oximeter can be vital for monitoring extreme activities such as high altitude climbing or diving to avoid dangerous situations.

CODE: 632-05-001

Finger pulse oximeter

Digital Pulse Oximeter Meditech Oxyo Pro, with color Oled Display, carrying case, automatic switch off, pulse histogram, adjustment
alarm setting, for measuring oxygen saturation and heart rate.
Technical Features
Small size and easy to carry.
Color OLED display with 4 different display modes.
Pulse histogram Spo2 with Dual LED wavelength
Parameters.
Oxygen saturation range: 0 ~ 99%.
Measurement accuracy: for oxygen saturation between 70%-99%, the accuracy is ± 2%.
Heart rate measurement: 25 - 240 beats/min, with an accuracy of ± 2%.
Easy to use with high accuracy.
Automatic shutdown after 20 seconds without signal
Works with standard AAA batteries and the continuous working time is 30 hours

Oximeter Wireless iHealth Air Po3 Bluetooth

CODE: 374-05-005

iHealth Air Wireless pulse oximeter PO3m. Compatible with iPhone, iPad and Android smartphones
Specifications
Measures and display instantly on your device and smartphone:
Sp02: Blood oxygen concentration
Pulse: Number of heartbeats per minute
PI: Refractive index (pulse) displayed in the iHealth MyVitals app Tracks data, graphs and history in the iHealth MyVitals app Bluetooth 4.0 wireless sync
Share your medical data with your healthcare professional or family
Micro USB charging
Secure and free data storage
Monitor oxygen saturation, diffusion index and pulse with iPhone, iPad and Android smartphones
For iOS and Android version 4.0+

OXYMETERS

Fingertip pulse oximeter (Bluetooth)

Fingertip pulse oximeter(Bluetooth)
Product Feature
Potable and Convenient
One-touch operation
Lower consumption

Pulse oximeter Nonin 8500

The Nonin 8500 palm pulse oximeter provides an easy and accurate way to assess blood oxygen saturation and heart rate from adults to neonates. Truly portable and with long autonomy, the Nonin 8500 palm oximeter meets the most demanding requirements at a very low cost. With 100 hours of battery life, the Nonin 8500 provides a cost-effective, environmentally friendly solution for your monitoring needs. The pulse oximeter Nonin 8500 palm pulse oximeter features LED lights for displaying pulse rate and blood oxygen saturation and 3 function keys for easy operation of the device. It also has reliable construction, with proven technology and accuracy in pulse oximetry from Nonin Medical. The Nonin 8500 palm pulse oximeter is energy efficient with 100 hours of battery autonomy, versatile with numerous connectivity options and features compatibility with the entire Nonin Pure Light® sensor range. In addition, it features a pulse power indicator with a tricolor perfusion indicator for instant monitoring. It has great accuracy you can trust in the most challenging conditions such as motion or low perfusion and rugged construction making the oximeter functional in the most demanding environments (USAF air ambulance certified).

CODE: 419-05-004

Table oximeter Nonin 7500-0103

The Nonin 7500 model is designed with a unique low profile that can be easily mounted on a table or in its own carrying case.
The simple functionality of the Nonin 7500 handheld, with a minimum battery autonomy of 16 hours , 4-hour fast recharge, and 70 hours of memory, makes it suitable for a variety of clinical and home care applications.
Like all Nonin portable oximeters, the Nonin 7500 provides a wide variety of reliable measurements with on-screen readings.

CODE: 419-05-003

Remote real-time patient monitoring with a cardiograph

The transmission of information on cardiac electrical activity through a portable, very small device.

Cardionow

It is an ecosystem consisting of a credit card-sized cardiograph and a recognized software, which transmits the user's cardiogram (ECG) in near real time with additional useful information.
Its weight is very light. It protects your health at all times.

DIGITAL & SMART PORTABLE DEVICES

Smartbands are also called activity trackers, "smart" and digital bracelets, which are primarily used to monitor the biometric activity of the person wearing them.

What does this mean? That their wearers can record their sporting activity, as well as the duration and quality of their sleep. The data is "transferred" and displayed on the user's smartphone where a special application (app) is installed. In the app various data is displayed and depending on the manufacturer, there is even information, advice and other interesting data aimed at improving the health status of the smartband user. The price range of smartbands is quite extended and depends on the capabilities and characteristics of each device.

Smartbands are relatively simple in their appearance and design and are the most affordable wearables available. The target audience is not only those who are involved in sports or just running and exercising to improve their fitness. They are also people who are simply trying to maintain their health at the best possible level and smartbands are the perfect solution for that.

DIGITAL SMARTWATCHES

Smartwatch N8 Ultra

Technical Characteristics

The new Wearfit Pro N8 Ultra smartwatch supports Bluetooth calling, has a square design and modern design with a large 49mm IPS touch screen 49mm curved with 2.5D glass and is equipped with many features such as heart rate monitor, SPO2 blood oxygen monitor, Thermometer, Multisport functions

N8 Ultra device
Shape Square
Dimension 49*41*13 mm
Weight 50 grams
Colors Silver, Black, Gold
Display IPS
Screen size 2.02 inches
Screen resolution 385*385 pixels
Compatible Os Android & IOS
Sensors
- Heart Rate Sensor
- G Sensor
Bluetooth V5.0
GPS NO
Speaker Yes
Microphone Yes
Multi-sport function Yes
Heart rate monitoring Yes
Blood oxygen monitor Yes
Blood pressure monitor Yes
Additional features
- Bluetooth call
- Thermometer
- Seated reminder
- Sleep monitoring
- Alarm clock
- Barometer
- Brightness adjustment... etc
Battery capacity 380 mAh
Normal use 2-5 days (battery life varies depending on usage, volume of calls and reminders and Social Media notifications.)

CODE: 648-25-016

CODE: 648-25-017

Smartwatch N8 Max

Technical Characteristics
Device N8 Max
Shape Rectangular
Dimension 42,7*36,4*12,8 mm
Weight 50g
Colors Black, Pink-Gold
Display IPS
Screen size 1.99 inches
Screen resolution 385*385 pixels
Compatible Os Android & IOS
Sensors - Heart Rate Sensor
- G Sensor
Bluetooth V5.2
GPS NO
Speaker Yes
Microphone Yes
Multi-sport function Yes
Heart rate monitoring Yes
Blood oxygen monitor Yes
Blood pressure monitor Yes
Smartwatch Color : Black Silicone Strap : Black
Additional features
- NFC access control
- Bluetooth calling
- Seated reminder
- Sleep monitoring
- Alarm clock
- Barometer
- Brightness adjustment... etc.
Battery capacity 380 mAh
Normal use 2-5 days
Application name WearFit Pro
Silicone strap
NFC Only for Smart Locks (no interface with bank cards)
Charging Wireless Charging

Emergency telephoneSpareOne

SpareOne is an emergency/emergency phone, a backup phone. The Enegizer Ultimate Lithium L91 battery - included in the package lasts 15 years!

CODE: 335-25-001

DIGITAL BLOOD PRESSURE MONITORS

BLOOD PRESSURE MONITOR

Blood pressure is the term used to describe the force with which blood presses against the sides of the blood vessels.

arteries as it circulates around the body.

High blood pressure (hypertension) can strain the arteries and organs, which can increase the risk of serious problems such as heart attacks and strokes. Low blood pressure (hypotension) is not usually as serious, although it can cause dizziness and fainting in some people. Monitoring blood pressure is the only way to tell if your blood pressure is too high or too low, because most people will have no obvious symptoms of hypertension.

DIFFERENT SOLUTIONS FOR EVERY NEED

A variety of blood pressure monitoring devices are available, so that blood pressure can be measured as much as possible.

One's preference is for the type of wrist or arm blood pressure monitor.

Arm blood pressure monitor

Classic design meets cutting-edge technology.
Thanks to the applied technology, measurements are fast and reliable.

Wrist blood pressure monitor

Small in size, but accurate.
Quick and easy to use and very convenient for everyday use, wherever you are.

Digital Arm Blood Pressure Monitor Nissei DSK-1011

CODE: 028-01-102

Additional Accessories
1.5V BATTERIES
4 x Alkaline AA size
CUFF SIZE
Size: 22 - 32 cm, with soft cuff

Innovative technology
Measurements are faster and gentler: blood pressure blood pressure is monitored during the gradual inflation of the cuff.

Irregular heartbeat detection
Detects irregular pulses, an indicator of cardiac arrhythmias.

Body sensor
It detects body movements or interference that may be that may cause measurement errors.

Dual memory, dual user
Stores up to 60 results in each memory bank.

Size: 22 - 32 cm. Smooth finish, wrapping gently around around the arm.

Switchable power supply
Can be used with an AC adapter (not included) or AA alkaline batteries.

Personal mode
The cuff inflation is adjusted according to the last 3 readings, to shorten the measurement time and improve the comfort.

Indication of circulatory risk
Displays the pulse pressure, a parameter related to the pulse pressure of the stiffness of the artery and the risk factors of circulatory risk.

ESH Clinically Certified
Technology in compliance with the IP2010 protocol of the European Hypertension Society.

WHO Classification
Values of blood pressure are classified according to the guidelines of the World Health Organization.

Digital Arm Blood Pressure Monitor Nissei DS-B23-04 Delicare

CODE: 028-01-200

Additional Accessories
CARRY BAG
For safe storage and transport
1.5V BATTERIES
4 x Alkaline AA size
CUFF SIZE
Size: 22 - 42 cm, with soft soft cuff

Innovative technology
Measurements are faster and more gentle: blood pressure is monitored during the gradual inflation of the cuff.

Irregular heartbeat detection
Detects irregular pulse, indicator of cardiac arrhythmias.

Body sensor
Detects body movements or interference that may cause measurement errors.

Wide range of comfortable cuff
The device checks and warns if the cuff is not worn correctly.
Size: 22 - 42 cm. Soft finish

Switchable power supply
Can be used with an AC adapter (not included) or AA alkaline batteries.

ESH Clinically Certified
Technology in compliance with the IP2010 protocol of the European Society Hypertension.

Extended warranty
The product has a 5-year warranty.

CODE: 028-01-100

Additional Accessories
1.5V BATTERIES
4 x Alkaline AA size
CUFF SIZE
Size: 22 - 42 cm

Digital Arm Blood Pressure Monitor Nissei DSK-1031

Automatic Operation
The oscilloscope (AUTO) or listening mode can be set by the user.

Irregular heartbeat detection
The inflation and deflation speed can be easily adjusted and the maximum inflation and deflation speed can be cuff constriction is adjusted according to the patient's parameters

Body sensor
Detects body movements or interference that may cause measurement errors

Dual memory, dual user
Stores up to 60 results in each memory bank

Smart rigid cuff
The device checks and warns if the cuff is not worn correctly. Size: 22 - 42 cm. Soft finish

Switchable power supply
Can be operated with AC adapter or internal rechargeable batteries NiMH, both included.

Indication of circulatory risk
Displays the pulse pressure, a parameter related to the stiffness of the artery and circulatory risk factors.

WHO Classification
Values of blood pressure are classified according to the guidelines of the World Health Organization.

ESH Clinically Certified
Technology in compliance with the IP2010 protocol of the European Hypertension Society.

Digital Arm Blood Pressure Monitor DS-11 Nissei

Wireless Blood Pressure Monitor iHealth Clear BPM1

Additional Accessories
TRANSPORT TENTS
For safe storage and transport
1.5V BATTERIES
4 x AA size Alkaline
HANDSET SIZE
Size: 22 - 42 cm

CODE: 028-01-104

CODE: 374-01-005

Innovative technology
Easy to use and quick to measure, it guarantees complete reliability, accuracy and convenience thanks to its innovative technical solutions.

Irregular heartbeat detection
Detects irregular pulse, indicator of cardiac arrhythmias.

Αισθητήρας σώματος
It detects body movements or interference that may be that may cause measurement errors.

Arm circumference 22-42cm.
Soft finish that wraps gently around the arm.

Average Measurements
Displays the average of the last three readings.

Switchable power supply
Can be used with an AC adapter (not included) or AA alkaline batteries.

ESH Clinically Certified
In compliance with the European Society of Hypertension Protocol IP2010.

Irregular heartbeat detection
Detects irregular pulse, cardiac arrhythmia indicator

Measurement at the touch of a button
With iHealth Clear, you will be able to conveniently transfer your measurements anywhere and store the measurements on your smartphone via WiFi.

Arm circumference 22-42cm.
Soft finish that wraps gently around the arm.

Comparison of results
1000 storage memories

ESH Clinically Certified
In compliance with the European Society of Hypertension Protocol IP2010.

Wireless Blood Pressure Monitor iHealth Track KN 550BT

Additional Accessories
User Guide
1.5V BATTERIES
4 x AA size Alkaline
HANDSET SIZE
Size: 22 - 42 cm

CODE: 374-01-003

Irregular heartbeat detection
Detects irregular pulse, cardiac arrhythmia indicator

Measurement at the touch of a button
With iHealth Clear, you will be able to conveniently carry your readings anywhere and save the readings on your smartphone via WiFi, iHealthTrack changes the colour of the screen (green, orange, red) depending on your results.

Check your blood pressure level with the JNC system

Arm circumference 22-42cm.
Soft finish that wraps gently around the arm.

ESH Clinically Certified
In compliance with the European Society of Hypertension Protocol IP2010.

Digital Wrist Blood Pressure Monitor Nissei Motion WS-C2-04

Additional Accessories
CARRYING CASE
For safe storage and transport
1.5V BATTERIES
2x Alkaline AAA size.

CODE: 028-01-201

High resolution system
A new measurement method, which scans the pulse wave six times more frequently than conventional blood pressure monitors.

Innovative measurement technology during inflation
Easy to use and quick to measure, it guarantees complete reliability, accuracy and convenience thanks to its innovative technical solutions.

Body sensor
It detects body movements or interference that may be that may cause measurement errors.

M-Shaped cuff
Improves measurement accuracy by binding the two bones of the wrist securely, so that the arterial blood vessels can be blood vessels are firmly clamped during inflation.

Irregular heartbeat detection
Detects irregular pulses, heart rate index, heart rate indicator arrhythmias.

Status function
Checks the correct position of the cuff before measuring.

Dual memory, dual user
Stores up to 60 results in each memory bank.

Easy Transportation
Compact and easily transportable thanks to the rigid and protective case.

WHO Classification
Values of blood pressure are classified according to World Health Organization guidelines.

Digital Wrist Blood Pressure Monitor Nissei WSK-1011

Additional Accessories
CARRYING CASE
For safe storage and transport
1.5V BATTERIES
2x Alkaline AAA size.

CODE: 028-01-101

M-Shaped cuff
The proprietary, patented technology "M-cuff" ®, captures the two arteries in the wrist securely and outputs pulse wave signals to give accurate measurements with an accuracy equal to upper arm monitors.

Easy Reading
Display with large digits. Touch switch operation.

Body sensor
It detects body movements or interference that may be that may cause measurement errors.

Irregular heartbeat detection
Detects irregular pulse, indicator of cardiac arrhythmias.

Circulatory risk index
Displays the pulse pressure, a parameter related to the pulse pressure of the stiffness of the artery and the risk factors of circulatory risk.

Dual memory, dual user
Stores up to 60 results in each memory bank.

ESH Clinically Certified
In compliance with the IP2010 protocol of the European Hypertension Society.

WHO Classification
Values of blood pressure are classified according to World Health Organization guidelines.

NISSEI PROFESSIONAL BLOOD PRESSURE MONITOR

Professional Blood Pressure Monitor DM-3000

Additional Accessories
NI-MH 4,8VDC
Rechargable battery
UNIVERSAL CABLE CHARGING
100-240V 50/60 Hz
SIZE CUFF
Size M-L: 22 - 32 cm/ 32-42 cm, soft finish.

CODE: 028-01-035

CODE: 028-02-109

CODE: 028-01-098

CODE: 028-01-099

Automatic or Manual Operation
Oscillometry (AUTO) or listening (MANUAL) mode can be set by the user.

Professional precision, easy operation
The speed of inflation and deflation can be easily adjusted and the maximum pressure of the cuff is adjusted according to the parameters of the patient.

Fits every patient
Two cuffs (size: 22 - 32 cm (M) /32 - 42 cm (L)) to suit patients with different arm circumferences, washable and with a soft finish that gently wraps around the arm.

7 Memories
Records the last 7 measurement results and average values.

Switchable power supply
It can operate with an AC adapter or internal Ni-MH rechargeable batteries, both included

Dual Screen
Two easy-to-read displays representing the mercury column and digital results.

Remote Use
The long inflation tube and 5-wheel trolley kit make it suitable for easy transportation.

ESH Clinically Certified
In compliance with the IP2002 protocol of the European Hypertension Society.

Wheel base for DM-3000 Blood Pressure Monitor

Rolling base for Nissei DM-3000 blood pressure monitor of robust construction. Suitable for Practices, Clinics and Hospitals to transport the sphygmomanometer to patient rooms.
Height 1 – 1.65 cm.

Professional Blood Pressure Monitor DM 500 Nissei

Mercury free
The traditional mercury column has been replaced by the LCD column display.

Rapid evaporation
During or after the measurement in a single movement.

Manual Measurement
Manual systolic and diastolic measurements

Liquid crystal display
Easy-to-read display representing the mercury column.

Low consumptions
Operates on two AA (LR6) alkaline batteries.

Professional Blood Pressure Monitor DM1000 Nissei

Automatic or Manual Operation
Digital alternative to the manual sphygmomanometer

Liquid crystal display
Backlit LCD column display with 1 mmHg graduations

Fits every patient
Supplied with std size cuff 23-32 cm.

ESH Clinically Certified
In compliance with the IP2002 protocol of the European Hypertension Society.

Mac 506 Fixed Wall Mounted Mercury Sphygmomanometer

Fixed precision mercury wall pressure monitor
MAC ANATS 506 high quality with modern ergonomic design
Operation According to the Riva Rossi/Korotkoff measuring method
Measuring scale 0 – 300 mm Hg with 2 mmHg graduations
 Measurement Accuracy ± 2 mmHg
Pressure Gauge Accessories
For hospital use
 Warranty 2 years

CODE:001-01-007

Target Fixed Blood Pressure Monitor Wall

Mercury wall-mounted sphygmomanometer Target fixed high-quality precision, with a modern ergonomic design. Measurement scale 0-300mmHg with a graduation of + 2mmHg, measurement accuracy + 2mmHg. It is fixed vertically and firmly to the wall for proper operation. For hospital use.
 Warranty 2 years

CODE: 018-01-007

Target Fixed Blood Pressure Monitor Mercury Wall

Mercury wall-mounted sphygmomanometer Target fixed high-quality precision, with a modern ergonomic design. Measurement scale 0-300mmHg with a graduation of + 2mmHg, measurement accuracy + 2mmHg Cuff 100% cotton gray, 14x54cm, self-adhesive or hook closure with metal basket for placing the cuff. It is fixed vertically and firmly to the wall for proper operation. For hospital use.
 Warranty 2 years

CODE: 024-01-006

Target 001 Aneroid Sphygmomanometer with stethoscope

Built-in Arm Sphygmomanometer with stethoscope
TARGET 001 analog with rotary Poiret valve, DRing
cuff, measurement scale 0-300 Hg.
Warranty 2 years

CODE: 024-01-001

Mac Check Anats 501 Aneroid Sphygmomanometer

Manometric pressure gauge Mac Check Anats 501 Japan. With built-in
stethoscope, power meter, DRing cuff, measurement scale 0 - 300mgHg, and
measurement accuracy ±3mmHg.
• Manometer with a diameter of 46 mm with a measurement scale from 0-300
mm hg, with a corresponding scale of a standard mercury manometer and
with subdivisions per 10 units.
• Precision air release valve with easy to turn tap
• Circumference cuff 22 - 32 cm with velcro d-ring closure
• Pressure measurement range 0 - 300 mmhg
• Measurement accuracy +/- 3 mm hg
Warranty 2 years

RESPIRATORY EXERCISERS, NEBULIZERS, DISPOSABLES, SUCTION DEVICES & CONSUMABLES

Respiratory Trainer Digital iBreath LT350

The ChoiceMMed Respiratory Trainer LT350 strengthens the respiratory muscles to help you breathe easier, feel better and improve your athletic performance. The device uses dual purpose training. Low-intensity, endurance Aerobic training and high-intensity Anaerobic training, while strengthening the muscles of inhalation and exhalation.

The Lung Trainer LT350 is ready to use with 6 levels of resistance. Each of the resistance levels can be adjusted to 5 positions. Train at the most comfortable level for you with 30 available settings. Increased exercise capacity and endurance Greater mobility and independence

Better coping skills in your daily activities Reduced shortness of breath, coughing and wheezing Fewer visits to the Emergency Room and less need for hospitalization Reduced anxiety and depression

Increase in quality of life

Indicator Type: TN

Dimensions and Weight

Dimensions: 161.2mm (L) x 61mm (W) x 117mm (H) Weight: 170g (without batteries)

Power requirements

Two AA 1.5V alkaline batteries Power consumption: less than 10mA

Two 2500mAh AA alkaline batteries could work continuously for 300 hours.

CODE: 170-09-002

Respiratory Trainer 3BALL

Lung trainer with three colored balls

Specifications

Made of transparent material

It has 3 chambers of 600, 900 and 1200cc/second in the 3 stages respectively (breathing volume).

It has 3 colored balls for easier reading of air volume. Light in weight and easy to carry. It has a special sticker with the patient's information. It has a small diameter spiral tube that connects to the practitioner and a soft plastic mouthpiece.

It is used individually for each patient

CODE: 168-09-006

Kubyneb nebulizer

KUBYNEB is a piston compressor aerosol therapy device approved for continuous operation. Compact in size, it has a convenient compartment for storing accessories and medicines. KUBYNEB is equipped with approved HI-FLO nebulizer that uses the most popular active ingredients.

Specifications
Compressor dry pump without lubrication and/or maintenance
Diet 230 V-50 Hz
Maximum pressure   3,0 bar 43,5 psi 300 kPa
Operating pressure Free flow 1,3 bar 18,9 psi 130 kPa
Operating flow   16 l / minute
Neb-rate with 4 ml solution 5.2 L / minute/ 0.50 ml / minute
MMAD (µm) EN 13544-1 3.25
Mode Continuous
Noise (EN 13544-1) 60 dBA
Weight 1.45 kg
Dimensions (LxWxH) 15,5 x 15,5 x 10 cm
Warranty 2 years

CODE: 318-09-021

Fun-Neb Children's Nebulizer

FUNNEB is a Children's treatment aerosol of 3A Italy that relieves respiratory problems. It is made mainly for domestic use.
It is also equipped with a strong compression piston which does not need lubrication. The unit contains an air filter which is replaced periodically (every 70 applications). It is designed according to the current European construction and safety standards.
FUNNEB is equipped with the following components:
NEBJET nebulizer ampoule, Nozzle: Nose & Mouth Mask: Adults & Children, Air tube, Spare filters, Non-toxic & washable markers.

Specifications
Maximum pressure: 185 kPa
Air flow: 10 L/min
Noise level: 58 dBA (EN13544-1)
Nebulization rate: 0.35 L/min (NaCl 0.9%)
Operating pressure: 60 kPa (0.6 bar)
Operational flow: 5 L/min

SUCTION DEVICES & CONSUMABLES

Aspeed2 AS800A Suction Device

3A Italy ASPEED2 PROFESSIONAL AS800A suction device, 1000cc tank, antibacterial filter and silicone tube, suction capacity 15lt, continuous operation, single pump.

Specifications
Electric piston compressor with thermal protection device.
Single pump version: low flow, high vacuum unit
Security: T1,6A – 250V
Single Pump Release Voltage: 230/240V~50Hz 150VA
Adjustable vacuum level: 0 ~ - 0,85 bar
Single pump air flow: 15L/min
Dimensions: 196 x 357 x 185 mm
Weight of single pump version: 2,5 kg
Noise level: 55 dBA
Operating conditions:
Temperature: Minimum: 0°C, Maximum: 40°C
Air humidity: Minimum: 10%, Maximum: 95%
Warranty: 2 years.

CODE: 071-09-017

Aspeed2 AS900A Suction Device

3A Italy ASPEED2 AS900A suction device, 1000cc container, antibacterial filter and silicone tube, Dual Pump.

Specifications
Electric piston compressor with thermal protection device.
Double pump version: high flow, high vacuum unit
Security: T1,6A – 250V
Dual Pump Version Voltage: 230/240V~50Hz70VA
Adjustable vacuum level: 0 ~ - 0,85 bar
Dual Pump Airflow: 22L/min
Dimensions: 196 x357 x 185 mm
Double pump version weight: 3,2 kg
Noise level: 55 dBA
Operating conditions:
Temperature: Minimum: 0°C, Maximum: 40°C
Air humidity: Minimum: 10%, Maximum: 95%
Storage conditions:
Temperature: Minimum: -10°C, Max: 50°C
Air humidity: Minimum: 10%, Maximum: 95%
Warranty: 2 years.

Aspiret suction, 15Lt/min

Specifications
Maximum Suction Pressure: -0,75 Bar
Flow Rate: 15Lt/min at -0.75 Bar
Noise Level with Canister: 59,60 dB
Weight: 2,95Kg
Warranty 2 Years

CODE: 318-09-018

Aspiret suction, 40Lt/min

Specifications
Maximum Suction Pressure: -0,80 Bar
Flow Rate: 40Lt/min at -0.80 Bar
Noise Level with Canister: 60,5 dB
Weight: 4,15Kg
Warranty 2 years

CODE: 318-09-016

Mini Aspeed Battery Plus Suction Device

Tracheotomy suction device, battery current, 3A model MINIASPEED BATTERY Plus can be applied even with a discharged battery by connecting the device to the current, with 1000cc container antibacterial filter and silicone tube, suction capacity 18lt/min. continuous operation with the battery for 35 minutes.
Specifications
Reciprocating compressor with lifetime lubrication.
Metal housing painted with epoxy powder coating.
Trend: 12VDC
Adjustable vacuum level: 0 ~ - 0,80 bar
Air flow: 18L/min
Dimensions: 37x10x24 cm
Weight: 5,5 kg
Noise level: 60 dBA
Battery charger: PRI: 200 – 250V~ 50 – 60Hz SEC:12VDC 0.5A Multi-Voltage

MaxiAspeed 6.2 Wheelchair Suction Device

Wheeled power suction device 3A MACHIASPEED 6.2, Italy 60lt with two 2Lt containers, antibacterial filters, silicone tubes and foot switch.
Specifications
MAXIASPEED 6.2p
90 l / min, 2 jars 2 l., Foot control lever
Equipped with 4 anti-static wheels with 2 brakes
Telescopic carrying handle
Plastic material with high strength electrical insulation according to the latest European safety standards
2 polycarbonate jars with safety valve (overflow protection)
Set of non-toxic sterile silicone tubes
2 pcs. 99% antibacterial hydrophobic filters
Vacuum regulator with bar centimeter
Automatic flow direction regulator for easy switching from one jar to another, avoiding the handling of contaminated parts Technical Features
High Flow - High Savings
Operating Cycle: continuous
MAX VACUUM (adjustable): 0 x - 0.90 bar 0 x - 90 kPa
MDD Class: IIa
Weight: 15 Kgs. about.
Dimensions: 470x580x560 mm
Warranty: 2 years

CODE: 071-09-009

Suction Device MaxiAspeed 9.4

Wheeled power suction device 3A MAXIASPEED 9.4 from Italy, with 2 containers 4lt., antibacterial filters, silicone tubes and foot switch.
MAXIASPEED 9.4p
90 l / min, 2 jars 4 l., Foot control lever
Equipped with 4 anti-static wheels with 2 brakes
Telescopic carrying handle
Plastic material with high strength electrical insulation according to the latest European safety standards
2 polycarbonate jars with safety valve (overflow protection)
Set of non-toxic sterile silicone tubes
2 pcs. 99% antibacterial hydrophobic filters

Multicare In 3 parameters meter
(Sugar - Cholesterol - Triglycerides)

CODE: 155-05-010

MULTICARE IN is a multiparameter self-monitoring system for monitoring metabolic disorders MULTICARE IN can accurately measure blood glucose, cholesterol and triglycerides in the same device within seconds with a small fingertip blood sample. The Multicare in 3 parameter meter is manufactured in Italy by Biomedical Systems International.

The package contains a pack of cholesterol diagnostic strips.

Measurements are made simply and quickly using tapes:

Blood glucose measurement with the Multicare in sugar strips (electronic measurement).

Cholesterol measurement with the cholesterol strips Multicare in.

Triglyceride measurement with the Multicare in. triglyceride strips.

The packaging is such that it is not easily damaged during transport and storage

DIAGNOSTIC DEVICES

Lux meter

The meter is manufactured in Italy by BSI Biochemical Systems International. He is an expert for health professionals and doctors. Lux is a professional multiparameter system for monitoring 6 blood parameters involved in common pathologies such as metabolic syndrome and anemia

Type of measurements: total cholesterol, HDL good, LDL bad, Triglycerides, HGB Hemoglobin and Sugar (with 1 finger prick, 4 measurements are made of total HDL, LDL, Triglycerides). Cholesterol is transported inside blood vessels associated with HDL high-density lipoproteins and LDL low-density lipoproteins. HDL is the "good" form, which reduces the risk of cardiovascular disease, because it is able to remove cholesterol, it is considered the "cleaner" of the blood. LDL is the "bad" form because it tends to leave cholesterol on the walls, forming deposits. The total level of cholesterol present in the blood is the sum of LDL and HDL lipoproteins, so it is not a given that it absolutely determines cardiovascular risk, what matters is the ratio of total cholesterol to HDL, which should be less than 5 for men and 4.5 for women.

- MEMORY; up to 1000 measurements
- Accuracy; Reflex measurement for cholesterol, triglycerides, HDL and hemoglobin
- Complete lipid profile in 3 minutes, hemoglobin in 5 seconds.
- Small sample; 3x15 µl for lipids, 7 µl for hemoglobin
- PIPETTES AND TIPS Provided inside the package Benefits

Fast results in just three minutes
Safe thanks to the elimination of the tape to avoid contamination.

Safe thanks to the elimination of the tape to avoid contamination.

DIABETES SUPPLIES – PENINSULA NEEDLES

Disposable, sterile insulin pen needles from 30G to 33G for insulin administration.

They are non-toxic, propylene-free, integrated needles, suitable for all commercially available pens.

They have a thin wall that reduces the pain and the duration of the infusion, a larger internal cannula, for a better flow of the medicine.

Different colored propylene cap to distinguish each needle size. With trible needles for painless piercing, with silicone oil lubricant at a low content of 0.25mg/cm2. Does not contain latex, to avoid allergies.

Sterilized with ethylene oxide for 5 years from the date of sterilization.

Painless Piercing Pen

Pen for personal use
For the quantitative assessment of blood glucose
Read the user manual before use

Packed in an individual blister pack with safe medical paper that guarantees maximum safety of sterilization and prevention of destruction or damage of the paper when opening the package. The quantity of the needles, which are 100 pieces, as well as their size, is mentioned in the box packaging. The box contains 12 boxes of 100 pieces (1,200 pieces).

DIABETES CONSUMABLES

Insulin Case-Fridge Dimensions 21x11x7cm

Insulin case with gel. It helps to always have the dark packages in their frozen state. Good for traveling with refrigerated medical bags or coolers As well as helping you avoid any problems on the trip, this will come in handy if you need medical help while you're away. Dimensions: 21x11x7cm

Characteristics:
- Holds 2 medicine vials and a syringe pen
- 2 pockets for small supplies. One is under the ice gel, so you can use the bag for testing or daily use, since your medications are safely in the fridge
- Re-chillable ice gel (included)
- Keep the medicine cold for up to 12 hours.

Attractive, durable nylon construction, you can wash it.

CODE: 153-19-004

Safety Lancets 30G 50 pcs.

Characteristics

The Safety Needle for one use is made of polyethylene and the needle (Austenitic stainless steel) .

The dimensions of the sharpener are 32mm ± 1mm. body length: 22.8 mm ± 0.5 mm, the size of the needle cap is 9 ± 0.5 mm. The outer needle is 3.3 mm ± 0.3 mm.

Needle diameter: 30G: 0.298-0.320mm;

Needle puncture not greater than 0.7N

- **Use** : The disposable lancet is used to collect capillary blood samples during blood glucose monitoring. The sterile disposable needle should be stored in a clean, ventilated place and keep the temperature at 0-40 ℃ , humidity at 0-80% RH , Pressure at 1KPA
- **Packaging** : 50 pieces / box
- **Caution** : Single use by one person.

DIAGNOSTIC TESTS

SARS-Covid -19 Antigen Rapid Detection Test (Rapid Test) by Joysbio

For in vitro qualitative detection of SARSCoV-2 nucleocapsid antigen in nasal swabs (NS) directly from individuals suspected of having COVID-19 after symptom onset. This test is provided for use by clinical laboratories or healthcare workers only. Not suitable for children under 3 years old.

Characteristics

 Clinical certification by an independent European clinical study. Rapid detection of SARS-COV-2 nucleocapsid antigen in less than 15 minutes. Less invasive nasal swab sample collection No special equipment required. Cost-effective solution for large-scale rapid test implementation Contents Box of 20 x Rapid Test Kit The Rapid Test Kit includes: 20pcs x test cassettes 20pcs x disposable tubes with 20 nozzles 20pcs x disposable bottles with 350μl buffer solutions 20pcs x sterile swabs Instructions for use (Greek / English) Paper base

CODE: 628-05-002

1 Package insert
1 Biosecurity bag
Instructions for use

Flu Test INFLUENZA A/B

INFLUENZA A/B is a rapid diagnostic test designed and manufactured specifically for influenza A and B viruses. Its use enables health personnel to make a real and documented diagnosis of the influenza virus within 10 minutes.
The diagnosis is made on a nasal swab sample. Comparable to the positive RT-PCR method (reverse transcription-polymerase chain reaction in real time) the relative sensitivity and specificity of the test are:

Susceptibility/Specificity	A strains of Influenza	B strains of Influenza
Relative sensitivity	84,4%	84,3%
Specialty	94,7%	95,5%

Each INFLUENZA A/B test includes:
•Test table
Hermetically sealed in a moisture-proof frame (along with a desiccant) which receives the sample and the test reaction takes place.
•1 Container of solution sufficient for 30 tests
•1 Sampling pen for collecting nasal discharge
•1 small mixing container (of sample and solution)
•1 dropper
To apply the sample from the mixing container to the test table.
It is included in boxes of 10 tests, each of which is sealed independently in a different bag. It is certified in Europe. Product life: 24 months

CODE: 348-05-005

Pregnancy Test CLEAR TEST

CODE: 010-05-001

The HCG (HumanChorionicGonadotropin) test is a one-step lateral chromatographic immunobiological test. . The test consists of aconjugatepad containing monoclonal β-HCG antibodies conjugated to colloidal gold and a nitrocellulose membrane coated with monoclonal α-HCG antibodies in the control area of the test and goatIgG in the control area of the test.

Results in 5 minutes
Quick / Quick
Simple / Simple
Reliable 99% / Accuracy 99%
High Sensitivity / High Sensitivity
Precise Result / Precise Result

The test is a qualitative immunological test. When the appropriate amount of urine sample is well applied, the sample is moved by capillary action through the control device. The T-line – a burgundy zone in the control region, develops rapidly if the concentration is close to or higher than 25 mIU/ml in the sample. The T-line will develop if HCG is absent or lower than 25 mIU/ml in the sample. The C-line – a burgundy zone in the control area of the test, should always appear regardless of the presence of HCG. It serves as an internal quality control of the control system.
Specification 4.0 mm

Ovulation Test

CODE: 348-05-002

Materials contained
•separately tested films
•instructions for use
Materials Required
•Containers for collecting urine samples
•Stop the clock or timer
Storage and Stability
•The kit should be stored at 2-30°C until the expiry date printed on the sealed container.
•The test should remain in the sealed pouch until used.
Do not freeze

Hemoglobin Detection Test FOB Fecal

The FOB (faecal) rapid detection test is a rapid, visually readable immunoassay for the qualitative detection of human hemoglobin in human faecal samples. The purpose of the test is to be used as an auxiliary tool in the diagnosis of pathological conditions of the lower gastrointestinal tract.

Use: Faecal occult blood (FOB) Immunoassay for the qualitative detection of human hemoglobin in stool samples.
MATERIALS CONTAINED IN THE PACKAGING
• 25 test devices in individual packages
• 25 sampling tubes: with about 2 ml buffer solution (contains very small amounts of sodium azide below the established permissible limit)
• 25 patient information forms regarding stool sample collection
• 25 stool collection cards
• 25 plastic bags
• 1 instruction sheet
NECESSARY MATERIALS NOT CONTAINED IN THE PACKAGE
• Absorbent paper to prevent splashing when opening the tube
• A clock with a timer or stopwatch
STORAGE AND STABILITY
• The test must be stored at 2°C to 30°C until the expiration date printed on the sealed bag.
•The test must remain in the sealed bag until use.

CODE: 348-05-007

Urine strips 100 pcs .

Urine strips are stable plastic strips on which the reagent areas are placed. The test is for the detection of one or more of the following analyzes in the urine: ascorbic acid, glucose, bilirubin, ketone (acetoacetic acid), specific gravity, blood, pH, protein, urobilinogen, nitrite and leukocytes.

CODE: 348-05-010

Stomach Helicobacter H PYLORI AG Test

Helicobacter pylori
Test for rapid detection of Helicobacter pylori (H. pylori) antibodies in whole blood, serum and plasma The test is a rapid, visually readable immunoassay for the qualitative detection of H. pylori-specific antibodies in human whole blood, serum samples or plasma. The purpose of the test is to be used as an auxiliary tool in the diagnosis of H. pylori infection.
MATERIALS CONTAINED IN THE PACKAGING
• Individually packaged test devices Each test contains dye-conjugated antigens and reagents that are pre-coated to the respective areas
• Disposable pipettes For introducing the samples
• Buffer Phosphate buffered saline with Tween 20 and preservative
• Information form with instructions for performing the test
MATERIALS REQUIRED NOT CONTAINED IN THE PACKAGE
• Sample collection container To collect the sample
• Stopwatch To measure time
Centrifuge For the preparation of serum / plasma samples

ΚΩΔ: 348-05-007

DIAGNOSTIC TESTS

Drug Test

The Urine Drug Test is an immunochromatographic method for rapid qualitative detection of drugs and their main metabolites in human urine, from a predetermined detection limit.

It is a fast and reliable diagnostic test, suitable for the detection of the most common narcotic substances (Methadone, Hashish, Cocaine, Amphetamine/Methamphetamine, Morphine, Benzodiazepine, Barbiturates, etc.).

They are offered in boxes of 25 tests, each sealed in an individual package detecting from one to 11 substances. They show results in 5 minutes and must be performed by a health professional.

AVAILABLE SUBSTANCE COMBINATIONS:
4-parameter Drug Test: Morphine, Hashish, Cocaine, Benzodiazepine / BZO, COC, MOR, THC

CODE: 348-05-017

Strep-A test

MATERIALS CONTAINED IN THE PACKAGING

1. Strep A test device
2. Instructions
3. Disposable sample dropper
4. Buffers A and B
5. Columns sterile
6. External positive and negative control

PRECAUTIONS AND EXTERNAL CONTROL

StrepA rapid test kits should be stored at room temperature between 4 and 30 o C (40-86 o F). The test device (strip) is sensitive to moisture and heat. Perform the test immediately after removing the test device from its plastic bag. Do not use the test after the expiration date printed on the package

ΚΩΔ: 348-05-004

Syphilis Test Ab Combo Rapid Test

The Syphilis test uses a combination of syphilis antigen-coated particles and anti-human IgG and IgM for the qualitative and selective detection of TP antibodies in whole blood, serum or plasma. The sealed single-use package contains a sample dropper. Packing: kit 30 tests.

ΚΩΔ: 348-05-016

42

HIV test 1/2 ABLUS COMBO RAPID TEST

High-sensitivity rapid membrane flow assay for the detection of HIV antibodies (against recombinant antigens and synthetic peptides). HIV I/II uses the immunochromatographic method to detect HIV 1/2 antibodies with a sample of whole blood or serum, or plasma.

A highly purified GP 41 antigen, recombinant p24 binding to subtype 0 specific synthetic peptide representing HIV-1 and gp36 representing HIV-2 are used in this test to detect HIV 1 & 2 antibodies .

No additional equipment is needed to perform the test. Result in 10 minutes. The tests are for professional use only. Detailed instructions for use accompany the tests. The package contains 20 tests. They are kept at room temperature.

Sensitivity : 99% Specialty : 99,8%

The HIV test The HIV virus (AIDS) requires a special test for its detection, since it cannot be detected with a general blood test. The scientifically accepted modern test method is the 4th generation antibody/antigen blood test, which is suitable for almost 100% of cases.

CODE: 348-05-014

Troponin Test (TROPONIN I)

The Troponin I Test is a rapid one-step immunochromatographic test for the qualitative detection of human cardiac Troponin I in whole blood, serum or plasma samples as an aid in the diagnosis of Myocardial Infarction (MI).

•Possibility of Diagnosis 4 hours after the appearance of the episode.

• Troponin I is released into the blood 4-6 hours after the onset of pain. It remains at detectable levels for 6-10 days in contrast to CK-MB which returns to normal values after the third day.

• Troponin I release has also been found in other cardiac conditions such as unstable angina, congestive heart failure, ischemic injury due to coronary artery bypass grafting.

• Due to its high specificity and sensitivity in myocardial tissue, Troponin I has become the most preferred biomarker for detection of myocardial infarction.

Accompanying materials

Solution

CODE: 348-05-013

Hbsag Combo Rapid Test (HEPATITIS B)

The Anti-HBs (HBsAb) Test is a rapid chromatographic immunoassay for the qualitative detection of hepatitis B virus antibodies in human blood/serum/plasma.

The anti-HBs test uses solid-phase immunochromatographic technology for the qualitative detection of anti-hepatitis B antibodies in human blood/serum/plasma. The test is a two-site in which the combination of polyclonal antibodies and recombinant HBs antigens are used for the selective detection of antibodies against HBs antigens with a high degree of sensitivity. Recombinant HBs antigens are immobilized on the test region 'T' and goat anti-HBsAg polyclonal antibodies are immobilized on the control region 'C' of the membrane.

Soehnle Infant measuring body height rod

The Soehnle 5001 height meter is a different way of measuring body height. Not with a measuring tape or a height rod, but using an electronic ultrasound measuring system. Easy to use, durable housing and timeless design - these are features of the Soehnle Professional height measuring unit.
Characteristics
Easy to use, fast and accurate
White plastic casing
Extremely light, weighing only 300g
Battery powered: 9V battery (not included)
LCD screen, 10mm high
Complete plane (help to find the horizontal)
Voice recognition
Auto-off function (approx. 30 seconds after last measurement)

Mechanical scale Seca 786 150Kg

Technical characteristics of balance 786
Scale type Pillar scale
Weighing surface 278 x 75 x 273 mm
Screen Type Engineering
Maximum weighing weight 150 kg
0.5 kg graduation
Size 295 x 910 x 500 mm
Weight 6.9 kg
224 altimeter technical data
Measuring range: 6-200 cm
Rating: 1 millimeter
Dimensions (WxHxD): 55 x 1,480 x 286mm
Divider dimensions (WxHxD): 260 x 90 x 50mm
Net weight: 1.4 kg

CODE: 048-36-002
CODE: 048-36-015 (WITH GAUGE)

Scale Digital 250Kg

Specifications
Large non-slip low profile platform.
Dimensions: 36,9x127,9x60,9cm.
Maximum weight: 220kg.
Accuracy: Per 100gr.
Large LED digital display screen.
Built-in height meter from 120cm to 202cm.
Automatic on/off.
Warranty 2 years.
Displays the user's weight and BMI.
Simple, Fully automatic with no operation buttons.
Large glass screen displays results in large red letters.
Built-in height meter with display on the digital display.
Weighing Range : 0-250 kg, Gradation by: 100 g
Automatic closing, RS232 interface upgrade port
Dimensions: 36.5x 49 x 89 cm (W x D x H), Weight : 13.6kg

CODE: 036-36-359 (7830.30)
CODE: 036-36-096 (WITH GAUGE 7831)

Soehnle Bed Scale

Soehnle Hospital Bed Scale 7711. Certified according to class III, Medical device directive (MPG) class 1 with Easy lifting system.
500kg weight scale
From 100 gr. up to 300kg
From 200 gr. up to 300kg
Specifications
Electronic weight system
Wireless transfer of measurement data from the foot sensor to the pointer
Scale 10 meters. Inner surface in PC/T (pre-priestly). LCD screen, digital letter height, 20 mm. Power supply battery and main connections Battery life 10 hours before recharging required. Mechanism lifts that separated by a foot sensor. Charger for 4 batteries (foot sensor) with quick vibration. Delivery includes 8 rechargeable batteries

CODE: 036-36-066

Soehnle Digital electronic wheelchair scale

Soehnle 7802 fully electronic chair scale
Specifications
Easy-to-read display with 15 mm digits
Hold functions
Raised arms for easy access to the chair by the patient
Works with electricity or batteries (4 x 1.5 V mignon batteries)
Battery life time up to 150 hours, User manual in Greek,
Weighing range: 200 kg (440 lb)
Accuracy : 100 g, Total weight: 27 kg
Size : 580 x 1100 x h 930 mm
Power : 230 V / 50-60 Hz, 10 mA, 2.2 VA
It is manufactured in Germany

CODE: 036-36-076

Scale Seca 760 Mechanical

Properties: Strong construction.
Large and easy to read dial.
Low profile and large platform.
Accurate and durable.
Specifications
Color Black, Ecru, Blue
Net weight 0.6 square 3.5 kg
Platform width 265 mm
Platform height 70 mm
Platform depth 265 mm
Product width 303 mm
Product height 118 mm
Product depth 470 mm
1 kg graduation
Capacity 150 kg

Scale Digital Seca 813

Step-off where the patient steps on the scale, and after stepping down the result is displayed
Auto-hold where the value display remains for a few seconds on the screen before the scale turns off
The Seca 813 Robusta Digital Scale has a wide steel base. It is completely flat and facilitates people with mobility difficulties. The seca 813 scale is suitable for gyms, pharmacies and also for the home.
The scale measures 433 x 47 x 373mm and weighs 2.9kg.
Specifications
Type Digital
0.1 kg graduation
Maximum weighing weight 200 kg
Size 433 x 47 x 373 mm

Weight 2.9 kg

CODE: 048-36-034

Scale Digital 7801 with suitcase carrier

Germany Soehnle Weighing Platform
Specifications
Main power supply: power adapter 230V / 50 / 60Hz,
10mA, 2.2VA, 2m power cable
Battery power for about 350 hours with 4x 1.5V mignon (not included)
Auto power off function in battery mode.
Platform dimensions M 310 x W 275 mm
Quatro-Tronic: platform with 4 load sensors.
Digital display: Housing made of durable plastic. It does not wear out and does not need maintenance.
Simple one button operation.
Unit conversion to kgr / lb
Soehnle Electronic Height Gauge 5001.01
Weighing range up to 200kgr
Weighing per 100gr
Scale dimensions: 400x310mm and weight 6kgr
Dimensions of yoke with suitcase: 605 x 395mm and weight 7kgr
Warranty

CODE: 036-36-052

Micromeasuring Scale 5k Soehnle 5k 8131.01

The Digital Scale 8131 from Soehnle Germany is used, either as an interval or contour scale, as a control or letter scale. The Soehnle 8131 electronic compact scale is just the right scale for all environments where you want to weigh quickly and reliably.
Specifications
One button operation for easy use
Receive counterweight across the entire weighing range
Easy to read LCD display
Screen size 12.7mm
Battery operated with 1x3v CR2430 Lithium
Energy saving function
Easy cleaning of the plastic casing
The weighing platform and upper housing are made of stainless steel
Platform dimensions 16x16 cm
Weighing Range 5kgr
Weighing per 1 gram
Warranty

CODE: 036-36-055

Digital Precision Scale Soehnle 9230 0.01gr

Germany Soehnle 9230 Precision Micrometer Digital Scale.
Ideal for laboratories, patisseries, food industry areas, pharmaceutical industries, hair salons and other businesses that need micro measurement.
Graduation 0.01 gr.
The electronic precision scale Soehnle-Professional 9230.01 is a very high precision measuring instrument ideal for weighing small quantities.
Specifications
Weighing and calibration
Piece count
Weight percentage function
Specifications
Measuring range: 0,6kgr
Rating: 0,01gr
Scale dimensions: 213mm x 193mm x 66mm
Platform: stainless steel
Power supply from the 230VAC, 9VDC power supply, or rechargeable battery
Illuminated LCD screen
It comes with a standard weight of 0.500 kg for calibrating the scale.

CODE: 036-36-045

Scale Sohnle 7758

Germany Soehnle Weighing Platform with wheels for easy transport.
Specifications
Version with battery, including power adapter
Weight range 200 kg
Weighing per 100gr
Dimensions 900 x 600 x 55 mm
Weight 12 kg

Microscope Slides

Slides are suitable for a reliable examination and prevention of diseases. These slides show strong adhesion characteristics and cover a wide range of applications. They do not allow the mast to fall better than any other plate. The special silane coating surface treatment creates permanent free polar bonds on the surface, which also through electrostatic attraction ensures cell and tissue adhesion and supports the formation of covalent bonds between the tissue and the glass surface. Tissue and cell substrates adhere quickly and without the use of further adhesives or protein coating agents. Slides are free of streaking and disturbing background staining, such as the blue or red background obtained using hematoxylin and eosin tissue stains on albumin-coated slides, or the brown background obtained during the immunoperoxidase process. During these processes they allow stronger enzyme-induction, without losing the tissue.
